

Sureplay SureTracks System

Specification

SP 11-10
SP 11-20
SP 11-30

SUREPLAY offers three track systems ranging from the economical SP11-10, the most frequently used SP11-20 to the state-of-the-art SP11-30.

The **SP11-10** is a water permeable, textured, economical surface offered in 13 standard colors. EPDM rubber is mixed with a single component polyurethane then cast-in-place with a mechanical paver. With a final thickness of 10mm, the system is also extremely durable.

The **SP11-20** is a three layer system consisting of a 10mm EPDM/Polyurethane base course, Followed by 2 coats of structural spray with embedded EPDM granules (available in a variety of colors). Creating a system that is all-weather, impermeable and shock absorbent.

The **SP11-30** is a technology advanced, all-weather extremely resilient track system. Starting with a 10mm EPDM/single component moisture cured polyurethane which is then coated with a highly sophisticated sealer. The wear course is made up of a two part pigmented polyurethane embedded with EPDM. The final product being spike resistant and truly state-of-the-art.
